EXPERIENCE

- UX Designer**

Multiview Financial Software Inc, Ottawa, ON

07/2021 - Present

- Created and implemented design solutions for Multiview Financial **ERP Software**, Barcode scanner app for phones and tablets. Which reduced the replenishment process time by 3hr/week.
 - Collaborated closely with the Product Advisor and Director of Product defining strategies for future product features.
 - Developed wireframes, prototypes, templates for cloud based **ERP software** and worked with the development team to ensure that the solution is both elegant and feasible.
 - Conducted design sessions and workshops in IMUG (Multiview’s annual conference with clients) which helped us to identify user pain points.
 - Conducted moderated and unmoderated usability studies to determine the most useful design solution for the user.
- UX Designer**

WIMTACH, Centennial College, Toronto, ON

03/2020 - 06/2021

- Architecting and developing complex, responsive medical **EMR application - GlobeMed** to be used by clinical staffs and providers.
 - Created robust and challenging **interaction design** specifications including concept models, user scenarios/stories, wireframes, interaction/state diagrams, interaction pattern specifications.
 - Worked closely with multi-disciplinary teams to create, evolve, and enforce **accessibility** standards.
 - Contributed to evolving branding, evangelizing user-centred design thinking, creating new interface guidelines and design patterns.
 - Developed** front-end UI using Angular 7+ (HTML/CSS & JS).
- UX Designer / Developer (Co-op)**

Cya live, Toronto, ON

09/2020 - 12/2020

- Designed and developed** various modules of the Cya live mobile application using **Flutter** (Dart Platform).
 - Successfully **led a team of 3** members to perform QA in Cya live application resulting in a 30% improvement in testing speed.
 - Created several user stories for the new designs through internal and external brainstorming sessions.
 - Analyzed user data from Cya live for improving the user experience of the platform and predict user growth.
- Test Engineer**

Infosys Ltd, Chennai, India

12/2014 - 04/2018

- Developed Hybrid Automation Framework using UFT for **Pega** based applications.
 - Worked extensively in testing applications in **Wealth Management** domain.
